

4825898 INTEGRATED POWER

82D 00316 D

T-58-1/13

INTEGRATED POWER

SEMICONDUCTORS, LTD.

1 Amp, 3-Terminal Positive Regulators

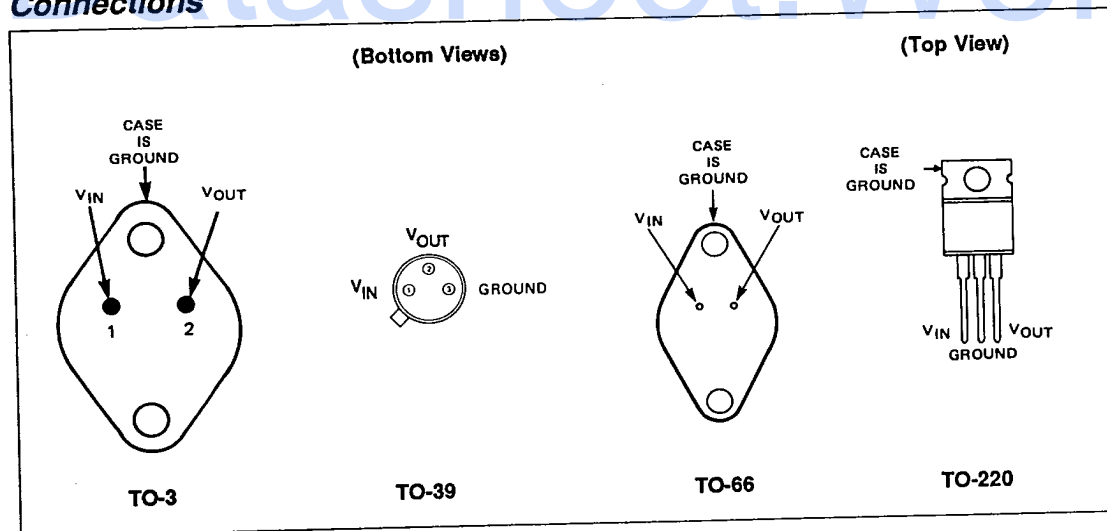

Description

The IP140A/ LM140/ IP240A/ LM240/ IP340A/ LM340/ IP7800A/ IP7800/ IP7800AC/ IP7800C series of three-terminal regulators is available with several fixed output voltages making them useful in a wide range of applications. The A-suffix devices are fully specified at 1.0A, provide 0.01%/V line regulation, 0.3%/A load regulation, and $\pm 1\%$ output voltage tolerance at room temperature. Protection features include safe operating area current limiting and thermal shutdown. The entire series of regulators is available in the metal TO-3 and TO-66 power packages. The IP340A/ LM340/ IP7800AC/ IP7800C series is available in the TO-220 plastic power package and the IP140A/ LM140/ IP7800A/ IP7800 series is now available in a new hermetic TO-220 style power package, as well as the TO-39 metal can.

Features

- 1% Tolerance
- 5, 12, and 15V fixed output voltages available
- 0.01%/V line regulation
- 0.3%/A load regulation
- Thermal overload protection
- Short-circuit current limit protection
- Safe area protection
- 100% thermal limit burn-in
- Start-up with negative voltage (\pm supplies) on output

Connections

Section 5 - Voltage Regulators
 IP140A, IP240A, IP340A, IP7800A Series, IP7800AC Series
 LM140, LM240, LM340, IP7800 Series, IP7800C Series

4825898 INTEGRATED POWER

Absolute Maximum Ratings

| | | | |
|---|--------------------|--|-----------------|
| Input Voltage ($V_O = 5V, 12V, 15V$) | 35V | Maximum Junction Temperature | |
| Internal Power Dissipation (Note 1) | Internally Limited | TO-3 Package K | 150°C |
| Operating Temperature Range (T_j) | | TO-39 Package H | 150°C |
| IP140A, LM140 | -55°C to +150°C | TO-66 Package R | 150°C |
| IP7800A, IP7800 | -55°C to +150°C | Hermetic TO-220 Package G | 150°C |
| IP240A, LM240 | -25°C to +150°C | TO-220 Package T | 125°C |
| IP340A, LM340 | 0°C to +125°C | Storage Temperature Range | -65°C to +150°C |
| IP7800AC, IP7800C | 0°C to +125°C | Lead Temperature (Soldering, 10 sec.) | 300°C |

Absolute maximum ratings are those values beyond which the safety of the device cannot be guaranteed. They are not meant to imply that the device should be operated at these limits. The electrical characteristics provide conditions for actual device operation.

Note 1. Although power dissipation is internally limited, these specifications are applicable for maximum power dissipation P_{MAX} of 2W for the TO-39 and 20W for the TO-3, TO-66 and TO-220. I_{MAX} is 1.0A for the TO-3, TO-66 and TO-220 packages and 500mA for the TO-39 package.

LM140, LM240, LM340, IP7800 Series, IP7800C Series

The • denotes the specifications which apply over the full operating temperature range, all others apply at $T_j = 25^{\circ}C$ unless otherwise specified.

Note 2. All characteristics are measured with a capacitor across the input of 0.22 μF and a capacitor across the output of 0.1 μF . All characteristics except noise voltage and ripple rejection ratio are measured using pulse techniques ($t_W \leq 10ms$, duty cycle $\leq 5\%$). Output voltage changes due to changes in internal temperature must be taken into account separately.

Dropout Characteristics

Applications Information

Fixed Output Regulator

*Required if the regulator is located far from the power supply filter.
 **Although no output capacitor is needed for stability, it does help transient response. (if needed, use 0.1 μF, ceramic disc)

Adjustable Output Regulator

$$V_{OUT} = 5V + (5V/R1) * I_Q R2$$

$$5V/R1 > 3 I_Q \text{ load regulation } (L_1) \approx \left[\frac{R1 + R2}{R1} \right] (I_R \text{ of Regulator})$$

Current Regulator

$$I_{OUT} = \frac{V_2 - V_3}{R1} + I_Q$$

$$\Delta I_Q = 1.3 \text{ mA over line and load changes}$$
